

# Lesson 1- Allah is the Creator of the Universe

## Reflection Journal

In the lesson, you learned how Allah is the creator of everything. In addition, you learned about the four elements (earth, water, air, and fire) that were created by Allah. Your task involves observing the four different elements that you learned about in nature. If you are unable to find the element in nature find an image of the element to reflect upon from the internet.

Element that you will Observe	What are things that you visually observe about the element (or how the element interacts with things in its surroundings)?	What are some thoughts that come into your mind about the way created the element?
Earth (any area of land outside)		
Water (can be droplets or a small a collection of water droplets)		
Air (passing of the wind outside)		
Fire (can be from a lamp)		
(Selection your own creation from Allah) <div data-bbox="207 1667 513 1881" style="border: 1px solid black; background-color: #ffff00; padding: 5px; margin-top: 10px;"> <p style="text-align: center;"><b>DON'T FORGET!</b></p> <p>Include lots of details in your observations.</p> </div>		

## Creations Detective

Observe the scene of nature below and write down all the creations of Allah that you see in the image.

## Be a Tour Guide

You have been hired to be a tour guide of "Al- Khaliq Wonders of Nature." As the tour guide your task is to show the group the different creations of Allah from nature (ie clouds, water etc).

Design a poster that you would use to illustrate the promotion for your tour group. In your poster include at least 3 Qur'anic ayahs or hadiths. In addition, in your poster include the names of the places you would show members of your tour group.

Ensure you add colour and lots of details to your poster.
