

Allah brings us from darkness to light – Ayat al-Kursi

Activity - Water and Oil do not mix

You will need

Empty water bottle

Mineral oil (baby oil)

Plastic cup filled with water

Black marker

Duct tape

1. Open the black marker and swirl the ink in the cup with water. Swirl it for a while so that the water becomes as black as possible
2. Pour the blackened water into the empty plastic bottle
3. Fill the rest of the bottle with the mineral oil
4. Close the lid and secure with duct tape
5. Shake the bottle well, trying to mix the oil and water.
6. Notice that it does not mix

Discussion:

In the same way as this water (darkness) and oil (light) does not mix, the darkness of ignorance and the true guidance from Allah that we receive does not mix. Allah brings us from the darkness into the light, if we are able to come into this light that Allah promises us then we cannot mix with the darkness that we may have come from.
