

### **Lesson 3 | Being Content with Allah's Blessings | You Reap what you Sow**

Discuss the topic of being content with Allah's blessings with a special focus on "greed". Explain the process of growing plants/fruits/vegetables in that one must water the plants, expose them to enough sunlight, and follow the process but then must leave it to God's hands to make their plants grow.

This activity is adapted from [www.simplylearningkids.com](http://www.simplylearningkids.com):

For each student, print and cut out the house (printable included below) on cardstocks of any colour. Choose fast sprouting seeds (marigolds, lima beans, and sunflower seeds work well) and soak them for 8-12 hours. Next, wet 5-6 cotton balls per student then squeeze out the excess water. Given each student a sandwich bag and 5-6 damp cotton balls. Tape each bag to the back of the student's Greenhouse and attach their projects to a window to observe!
