

The Creation of the Universe

Activity – Great Planetary Presentation

1. Have students pick one planet from the following list:
 - a. Saturn
 - b. Neptune
 - c. Jupiter
 - d. Mercury
 - e. Venus
 - f. Uranus
 - g. Mars
 - h. Earth
2. Ask them to do some research on the planet
3. Use Quranic ayahs and hadith that talk about the planets and the Earth
4. Create a visual aid of their research on the planet
5. Allow each student some time to present their visual aid in the classroom

Discussion

After all the students have had a chance to present their visual aids, discuss the magnanimity of the planets.

Who created these?

Can they be created by chance?

Is there a super being controlling these?

How do they not collide?

Allow the students to discuss and share their thoughts
