

## M1-F1- Proof of Allah's Existence

Questions with follow up activity – making and interactive foldable book

**Note to Teacher:** the students could watch the YouTube about the planet earth and the DNA (links provided below) which would help them increase their understanding.

The children could then answer the following questions or instead answer the questions by first making the foldable interactive notebook, and then writing down the answers, which ever works out for you and your students. The foldable/interactive notebook can be done on a folder or a Bristol board

What is the argument of intelligent design? Explain with examples about order and organization. How does the Bedouin answer when asked as to how does he know God exist? What does Imam Jafar as-Sadiq (a) say about it?

What is the cosmological argument? What is the other name of this argument? What about the Primary cause? Use the line of domino example to explain your thoughts.

How do we have the innate desire to know a higher being?

What helps develop this more?

What are some things that cause a veil (cover) over this natural instinct? What is the mission of the Ambiya in relation to this veil?

How do we have the innate desire to know a higher being?

What helps develop this more?

What are some things that cause a veil (cover) over this natural instinct?

What is the mission of the Ambiya in relation to this veil?

What is the cosmological argument? What is the other name of this argument? Explain the concept of Primary cause? Use the line of domino example to explain your thoughts.
